

OSM - EFFECTIVE ACCIDENT INVESTIGATION SAF7002

PURPOSE: The three primary tasks of the accident investigator are to gather useful information, analyze the facts surrounding the accident, and write the accident report. The intent of this workshop is to help you gain the basic skills necessary to conduct an effective accident investigation at your workplace. Only experience will give you the expertise to fine-tune those skills.

LEARNING OUTCOMES: At the end of the period of instruction with 100% accuracy, the student will:

- Describe the primary reasons for conducting an accident investigation.
- Discuss employer responsibilities related to workplace accident investigations.
- Conduct the six-step accident investigation procedure

CONTENT:

- Initiating the Process
- Documenting the Accident Scene
- Conducting the Interviews
- Analyzing the Accident Process
- Determining Surface and Root Causes
- Developing Effective Recommendations
- Writing the Report
